

## Former Honeywell Veterans Announce Formation of New Company, 2GIG Technologies

*2GIG Technologies conducting beta testing on next-generation home security solution*

Melville, NY ([PRWEB](#)) April 29, 2009 -- Former Honeywell Security veterans, Lance Dean and Scott Simon announced today that they have officially joined forces to form a new company, [2GIG Technologies](#).

With corporate offices located in Melville, NY, the company is nearing completion of its initial product launch with the introduction of GO!Control, the first self-contained alarm panel with color LCD touch screen. 2GIG's product lines not only includes the latest in residential security technology, but also a variety of home automation, remote control, energy management and wireless features.

"We have been in research and development the past couple of years and are currently in beta testing," said Lance Dean, co-founder of 2GIG Technologies. "We are excited to bring a self-contained solution that represents a product that dealers have been requesting for years."

Lance Dean currently oversees sales and marketing of 2GIG Technologies. As an industry insider for over 20 years, Dean managed key national accounts for Honeywell and was one of the top-producing professional in the residential security industry. Scott Simon brings over 20 years of security experience to 2GIG. While at Honeywell, Simon most recently managed the AlarmNet business.

Simon adds, "We are excited about the terrific response we have received to our product offerings. We are planning on announcing a number of key and strategic partnerships in the near future which will help accelerate our growth and development in the industry."

About 2GIG Technologies:  
[2GIG Technologies](#) is engaged in the business of manufacturing and selling home security systems and related hardware, software and services. Additional information is available at [www.2gig.com](http://www.2gig.com).
