

2GIG Technologies Receives ETL Certification of Go!Control Security Console

ETL Certification of 2GIG's security console is received

Melville, NY ([PRWEB](#)) October 5, 2009 -- [2GIG Technologies](#) today announced that following the successful testing of its Go!Control security console it has received ETL certification.

The [Intertek](#) ETL Listed Alarm System Certification program helps to ensure safety and maintain the highest level of alarm system reliability for companies in the Life Safety and Security industry. Certification ensures full compliance with all federal, national and local standards and codes in both the United States and Canada.

"By receiving the ETL certificate of compliance, this provides another important step in 2GIG's progression," said Scott Simon, co-founder of 2GIG Technologies. "We believe this helps validate our commitment to providing state-of-the-art product offerings and will accelerate our introduction into the residential security and home energy/ management markets."

The ETL certification of the Go!Control security console signifies that 2GIG meets or exceeds operational or safety industry standards in the following areas:

- UL 985: Requirements cover household fire warning system control units intended to be installed in accordance with the National Fire Alarm Code, ANSI/NFPA 72, and the National Electrical Code, ANSI/NFPA 70.
- UL 1023: Requirements cover burglar-alarm system units intended for use in residential applications.
- ANSI/SIA CP-01: Recommended design features for security system control panels and their associated arming and disarming devices to reduce the incidence of false alarms.
- CAN/ULC - 5545: Canadian requirements for residential fire warning systems.
- CAN/ULC - 51023: Canadian requirements for household burglar alarm system units.

About Intertek

Intertek specializes in electrical product safety testing, EMC testing and benchmark performance testing. It is among the industry leaders in its scope of testing. It is among the industry leaders in its scope of testing and accreditations.
